Feature: Scheduling & Job Status Visualization

Responsive,
streamlined
and intuitive
user interface

The screenshot displays the 'Schedule' interface for 06/14/2018. The top navigation bar includes icons for Management, Notifications, Analytics, Account, Help, Schedule, Customers, Delivery Items, Invoices, Estimates, and Add WO. The main view is a calendar grid with columns for time slots from 07:00 AM to 06:00 PM. Rows represent different mobile users. Jobs are color-coded by status: green for 'Completed', orange for 'On Site', blue for 'In Transit', and light blue for 'Scheduled'. A map at the bottom left shows the geographic distribution of these jobs, with red pins indicating locations. A 'List' view on the bottom right provides a detailed view of the scheduled jobs, including company names, user assignments, and scheduled times.

The screenshot shows the mobile app interface for 'SM N950U'. The top status bar shows the time as 4:31 PM and battery level at 73%. The main screen is titled 'Check List' and features the Sage logo. Below the logo are four large circular icons: 'Check List' (orange with a checklist icon), 'Work Orders' (grey with a clipboard icon), 'Estimates' (grey with a calculator icon), and 'Forms' (grey with a document icon). The bottom navigation bar includes a back arrow, a home circle, and a menu icon.

Security is paramount

MobiWork is built with security and data protection as a top priority. Our clients rely on MobiWork for their day-to-day operations and most of the information manipulated is vital to their business.

MobiWork security measures and credentials far exceed what most companies can provide or put in place. MobiWork also continuously invests considerable time, energy and resources on security and data protection to meet the growing demands and challenges of security.

In addition to its internal tests and assessments, MobiWork regularly undergoes external security and vulnerabilities validations and certifications by the most reputable and recognized security companies.

Data encryption

MobiWork uses industry-leading standard SSL to encrypt all data in transit. This includes all common mobile devices (smartphones, tablets, rugged devices...) and the cloud based platform as well as all com the cloud based platform and browsers or 3rd party solutions (e.g. accounting software...).

MobiWork uses the strongest SSL encryption available on the market (AES 256-bit encryption, 2048-bit ke SHA-2) to ensure maximum protection.

MobiWork also encrypts all sensitive data at rest (e.g. all passwords are one-way encoded using the robust internal databases and MobiWork also offers the option (at an additional cost) to encrypt all data at rest s based data storage (Amazon S3).

Sage Property Maintenance

Powered by MobiWork

Features: Hardware Platforms & Carriers

Multiple platforms:

Smartphones, Tablets, Rugged Devices
Android, Apple IOS, *BlackBerry*
